MODULE 1 – LAB EXERCISES

The following lab exercises are designed to give trainee an opportunity to test in practice the material outlined in Introduction to AWS Services training manual.
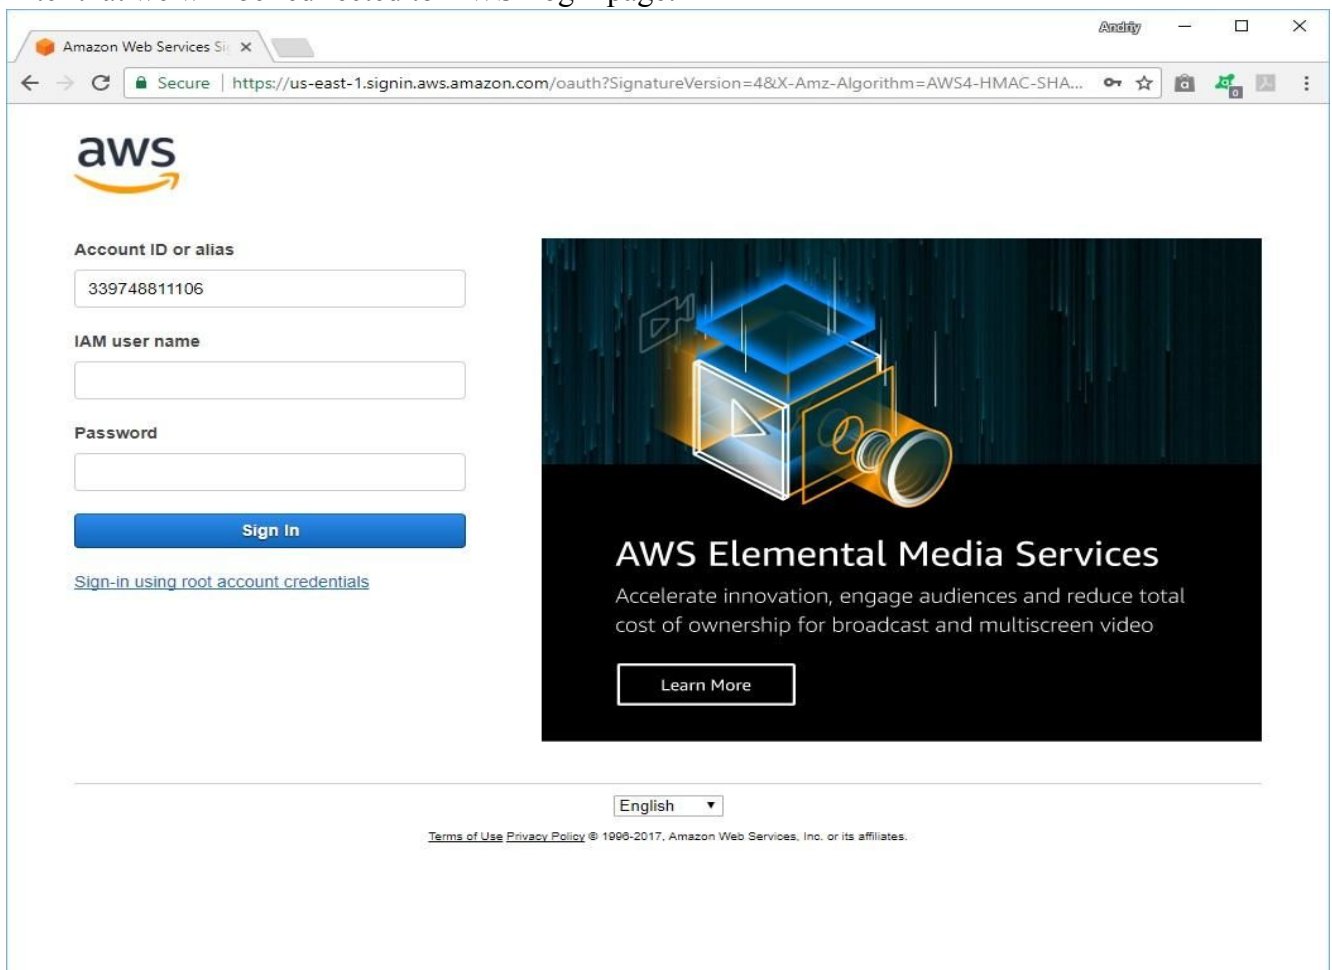

1. Signing-in AWS Management Console

We are using URL

https://339748811106.signin.aws.amazon.com/console

to sign-in AWS Management Console for training purpose.

After that we will be redirected to AWS Login page:

Enter IAM User name and Password here and then click "Sign In" button. AWS Console Home page will be opened:

| 📋	"**Student1**" ... "**Student50**" values are pre-defined as IAM user names for training purpose. Password is set to `$training0` by default.

2. Exploring AWS Console main page

Please have a look at AWS Console main page entirely (scroll it down). Identify primary topics, sections and items.

Please try to open all scroll-down menus at the top of page:

Determine for what each scroll-down menu is intended and what the content of each of them is.

Please explore in details AWS Regions scroll-down menu:

Determine which AWS regions and Availability zones are available to be selected for training purpose.

Please select your desired region / zone for further using in lab exercises (the screenshot below is an example only; it is not mandatory recommendation for everybody).
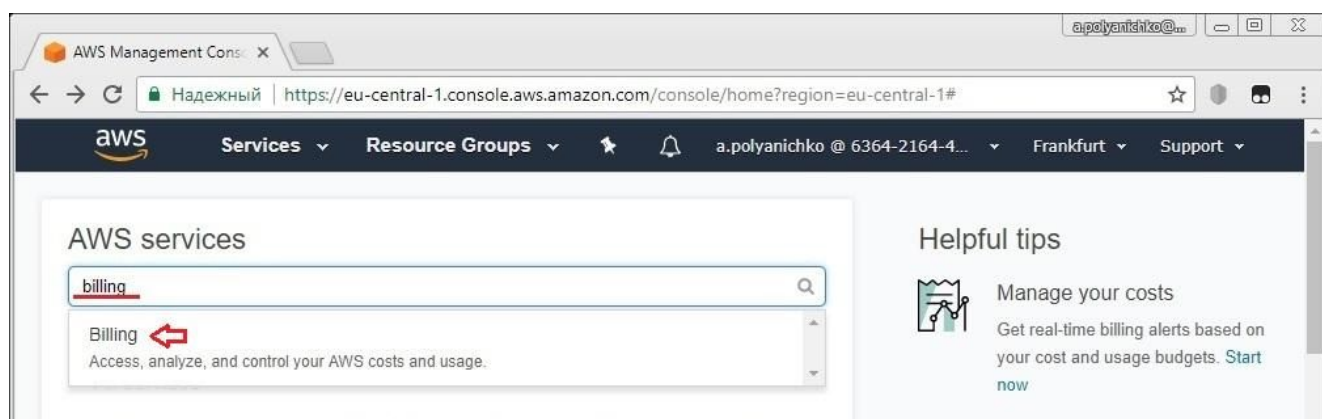

Please identify all AWS services listed in MODULE 1 training manual:

(At the training preparation we counted 29 listed services. Let's compare our attentions!)

3. Search function and AWS Billing Dashboard

Please try to use search function on AWS Console main page to find AWS Billing service:

Type "billing" keystroke in search field and then click on Billing item the system offers. AWS Billing Dashboard page will be opened:

Please explore left-hand menu on the page in brief.
